

Anexo 01 — Modelo fisico final (MJCF)

Archivo: Cuerpo/DUM4_grab.xml

Para que sirvio:

Modelo del robot en formato MJCF de MuJoCo, version final usada en todo el desarrollo de agarre y en el motor de animacion. Define los 21 cuerpos rigidos, las articulaciones con sus limites en radianes, los 15 actuadores de posicion con sus torques, las restricciones de igualdad leva->dedos, y los elementos de la tarea de agarre (bola amarilla, sites de palma, equality de sujecion).
